Conference Agenda

- VIP Gala Evening – 17 Nov 2025 (reserved for VIP ticket holders)
    - 17:00 Welcoming Drinks
    - 18:00 Organizers & Sponsor Announcement
    - 18:30 Mystery Game
    - 19:00 Dinner
    - 20:00 Drinks & Networking

- Day 1 – 18 Nov 2025
    - 09:00 Welcoming
    - 09:15 The Country of Origin – South Africa's Mineral Wealth
    - 10:00 Fossil Fuels vs Renewables Debate
    - 11:00 Future of Commodities
    - 12:00 Lunch & Networking Break
    - 13:00 Minerals of Africa
    - 14:00 Agriculture and the Finance Sector
    - 15:00 Mergers & Acquisitions Panel
    - 16:00 Networking Break

    - 17:00 Financial Commodity Markets
    - 18:00 Supply Chain Geopolitics Panel
    - 19:00 Green Energy Future
- Day 2 – 19 Nov 2025
    - 09:00 Critical Minerals
    - 10:00 Battery Metals – the New Gold Rush
    - 11:00 Capital Markets in Commodities
    - 12:00 Lunch & Networking Break
    - 13:00 World Economic Outlook
    - 14:00 Oil, Gas & Petrochemicals
    - 15:00 Marketing in Multinationals
    - 16:00 Networking Break
    - 17:00 Investment & VC Future
    - 18:00 Ministerial Discussion on National Commodity Economy
    - 19:00 Disruptive Tech, Robotics & AI
- Day 3 – 20 Nov 2025
    - 09:00 Intergovernmental Discussion
    - 10:00 Hydrogen Economy
    - 11:00 Billionaire's Row
    - The Networking Continues!

VIP Gala Evening – 17 Nov 2025

The VIP Gala is an exclusive VIP-delegates only event.

Theme: Black Tie Commodity Event

17:00 Welcoming Drinks

18:00 Organizers & Sponsor Announcement

18:30 Mystery Game

19:00 Dinner

20:00 Drinks & Networking

Day 1 – 18 Nov 2025

09:00 Welcoming

Neville Matjie, CEO, Brand South Africa

09:15 The Country of Origin – South Africa's Mineral Wealth

The world runs on energy from South Africa. Energy pours into vehicles made from metals from South Africa. Vehicles drive to homes where dinner was grown in South Africa.

It's time that the world sees the "Made in South Africa" mark in full.

Renowned for our coal, iron ore, wheat, maize and citrus, our chromium and lithium and our fruit-bearing soil – South Africa is a home, a hub, and the world's next biggest commodity destination. As the prime destination for investment into battery metals, base metals, food, energy and infrastructure, South Africa stands positioned to become the single largest economy in Africa via natural resource exports alone.

Recognizes as the most trusted economy in Africa, the country is yet to elaborate upon its reputation for resources, and to make the "Made in South Africa" brand known.

This panel brings together government, industry leaders, and investors to unpack how South Africa can position its national brand as a trusted, innovative, and competitive country of origin.

This panel showcases South Africa's unique strengths as a commodities and investment hub, explores how the Nation can drive trust and premium value in global markets, and examines the country's role in Africa's commodity integration into global value chains.

As the first of many high impact discussions, this panel will highlight how public and private sectors can align to amplify South Africa's commodities and create a future-ready national brand.

10:00 Fossil Fuels vs Renewables Debate

In this highly anticipated world-shifting discussion, the foremost leaders in Coal Mining and Green Energy Advocacy battle for the trophy – what does the future look like? Black, or Green?

Parshant Goyal, CEO, Jindal Africa
Sephela Makete Thema, Director Fraser Alexander (Coal)
Forbes Padayachee, CEO Yellow Door Energy (Solar)
Samantha Graham Mare, Deputy Minister of Energy South Africa (Green Energy)

11:00 Future of Commodities

Which commodities are becoming critical to humanity's survival, and can they run out? Which commodities will be highest in demand in the next 5 years? As an investor, exploration company, and manufacturer, how can we invest sustainably in those commodities? What role will banking play in the changing world trade systems? How will supply chains change in the next 5 years?

Is asteroid mining and space travel a reality that will affect the commodity sectors in the near future at all? At which point will humanoid robots replace humans in critical hand-labor jobs, and how can we prevent mass-unemployment as a result?

The Future of Commodities panel aims to answer these questions.

Anje Kruger, CEO, Hibarri
George Bennett, CEO, Rainbow Rare Earths
Reserved

12:00 Lunch & Networking Break

13:00 Minerals of Africa

The world is hungry for cobalt, lithium, manganese, graphite, and rare earths. Africa has them. But will we set the price or just ship the ore? Electric vehicles, aviation, steel, construction, robotics, space travel, data centres, solar production. Who earns and who sweats? What's changing in exploration, licensing, and regulatory frameworks? Where are funds flowing and why? From West Africa's bauxite to Southern Africa's lithium belt, we'll unpack where the smart money is going and what it means for governments and

private players alike. How do we unlock investment and capital solutions in these long-ignored but critical areas?

This panel is essential for miners, engineers, geologists, commodity traders, transporters, ports and ministerial level government officials. This conversation strikes at the heart of the African future.

Ian Chauke, Acting General Universal Coal

14:00 Agriculture and the Finance Sector

Agriculture is one of South Africa's most powerful brand ambassadors – feeding the continent and exporting to the world. This panel will explore how South Africa's agri-sector shapes the "Sourced from South Africa" narrative, from wine and citrus to grain and livestock.

We'll discuss how sustainable farming, innovation, and food security drive trust with global buyers, and how agriculture positions South Africa as a reliable partner in international trade.

Paul Makube, Senior Agricultural Economist FNB
Wandile Sihlobo Chief Economist Agbiz & Author
Dr Lidel Kelly CEO, NALDCCAM & Global Chamber Yaounde Cameroon Metro
Sakhumzi May , Chief Economist Land & Agricultural Development Bank
Nadine Watkins, Managing Editor Newskoop, Moderator

15:00 Mergers & Acquisitions Panel

The M&A landscape in the commodities sector is no longer just about scale – it's about access, influence, and future-proofing. This panel breaks down how dealmaking is shifting in the age of geopolitical tension, capital discipline, ESG mandates, and resource nationalism. Whether it's upstream mining consolidation, midstream infrastructure takeovers, or downstream integration plays in energy and manufacturing, the game has changed.

This is where the real negotiators gather – investment bankers, legal architects, corporate development leaders, private equity, sovereign wealth funds, and regulators. The room will be filled with people who don't just talk about deals – they close them.

Zamani Ngidi, Business Unit Manager AON
Ionut Lazar, Principal CRU Market Analysis
Shawn Duthie, Director Control Risks
Sherri Hayat, Director Morae

16:00 Networking Break

17:00 Financial Commodity Markets

Behind every shipment of iron ore, barrel of oil, or tonne of copper is a web of financial instruments, hedge positions, and risk exposures that dictate how capital flows, contracts are written, and economies are buffered.

The Financial Commodity Markets Panel pulls back the curtain on the mechanics of global commodity finance – futures, options, swaps, indices, ETFs, structured notes, and everything in between. This panel is not about theory – it's about the structures, policies, and players that move billions in commodity-linked trades every day.

Manqoba Madinane, Senior Industry Analyst Commodities RMB
Christo De Wet, Country Manager Luno

18:00 Supply Chain Geopolitics Panel

Shipping prices have recently skyrocket overnight due to a series of factors causing a massive domino effect that is affecting global inflation and disrupted supply chain ecosystems.

The Supply Chain Geopolitics discussion dissects the increasingly complex and volatile landscape shaping and disrupting global trade. Are bottlenecks in East Africa and the Suez Canal a serious concern? What are the implications of an unchanged Panama Canal and what volume of global trade flows through these two vital channels? What is the effect of the Houthi Rebels, pirates and other conflict instigators on shipping? What supply chain infrastructure will be developed, that serves as enabler of trade globally, and what is the 10 year outlook on these infrastructure developments?

These are the questions concerned in the Supply Chain Geopolitics Panel.

Ntshengedzeni Gilbert Maphula, ACEO ECIC
Zera Zheng, Global Head of Business Resilience Consulting MAERSK
Reserved
Shawn Duthie, Director Control Risks, Moderator

19:00 Green Energy Future

This high-level dialogue brings together industry leaders, policymakers, and innovators to explore the transformative role of renewable energy in the global commodity landscape. It will focus on emerging trends, sustainable practices, and the economic opportunities driving the shift towards cleaner energy solutions, under which key questions include:

What are the repercussions of inaction toward renewables for Humanity? Why is renewable energy a relevant discussion? Does renewable energy truly solve the problem? Which alternative energy solutions have been effective or promise to be effective in the past?

Which key economic opportunities are directly intertwined with the need for renewable energy? Are carbon credits relevant?

Forbes Padaychee, CEO Yellow Door Energy
Ana Hadjuka Shields, Founder & CEO Africa Green Co.
Aradhna Pandanum, Executive Director & CEO The Impact Catalyst
Sithobile Khoza, Senior Energy Analyst & Economist Green Cape

Day 2 – 19 Nov 2025

09:00 Critical Minerals

The Critical Minerals Discussion dives into the urgent questions shaping corporate strategy around these minerals – who controls them, where they're found, how they're extracted, and what it will take to secure their supply in an increasingly resource-constrained world. Resource nationalism? Industry value projections?

Critical minerals are the beating heart of the 21st-century economy. Without them, there are no batteries, no EVs, no wind turbines, no semiconductors, no military tech, and no energy transition.

Nick Beukes, Physical Metals Trader AgriSA
George Bennett, CEO Rare Earth Minerals

Stefano Marani, CEO Renergen

10:00 Battery Metals – the New Gold Rush

As the world races toward electrification, demand for battery metals like lithium, cobalt, nickel, and graphite is surging. This panel will explore the dynamics of the new resource boom — from supply constraints and price volatility to innovation in mining, refining, and recycling. We'll discuss who stands to win in this global scramble, how investors are positioning, and what the rise of battery metals means for the future of energy, mobility, and industrial growth.

11:00 Capital Markets in Commodities

Commodities are deeply intertwined with global capital markets – and that connection is only tightening. The **Capital Markets in Commodities Panel** explores how financial structures, capital flows, debt markets, equity issuance, and structured products are evolving to support the next phase of growth, infrastructure, and innovation in the global resource economy.

This is the session where financiers, CFOs, exchanges, fund managers, and sovereign risk assessors speak openly about the balance between capital access and market volatility – and where the next wave of funding will come from.

Hirander Misra, Chairman & CEO GMEX Group & Zero13
Sebastian Wagner, Founder & CEO DMWA Resources
Avramis Despotis, Founder & CEO Tradetopia

12:00 Lunch & Networking Break

13:00 World Economic Outlook

The world economy is at an inflection point. Rising geopolitical tensions between East and West, a crude oil war, shifting shipping routes, rapid AI disruption, and the urgency of Net Zero climate transition goals are rewriting the rules of trade and investment.

This panel brings together leading economists and market strategists to examine the forces shaping global growth, capital flows, and commodity demand. From inflation and interest rate cycles to emerging market resilience and the future of globalization, we'll unpack what lies ahead for businesses, investors, and policymakers in the decade to come.

Dr Rutendo Hwindingwi, Founder and CEO Tribe Africa
Zaynab Hoosen, Senior Africa Analyst & Chief of Staff Pangea Risk

14:00 Oil, Gas & Petrochemicals

The Oil, Gas & Petrochemicals Panel offers a deep-dive into a sector in transition. As energy security, decarbonization mandates, and shifting global demand redefine how hydrocarbon resources are explored, produced, traded, and consumed, this panel will bring together regional NOCs, international majors, petrochemical giants, pipeline infrastructure leaders, carbon market specialists, and policy architects to confront the hard questions facing the industry.

Joe Amadi-Echendu, Chair, Board of Directors of the International Society of Engineering Asset Management

15:00 Marketing in Multinationals

Marketing inside a multinational isn't about copy-pasting campaigns across countries – it's about creating *relevance* at scale. In this panel, we'll dive into how the best global brands strike the balance between consistency and local nuance, how they translate storytelling into measurable impact, and how they leverage data, culture, and customer insight to build trust in every market they enter. Expect candid insights into what actually works (and what doesn't) when you're tasked with protecting a global brand while driving growth in an environment where consumer expectations change faster than quarterly reports.

Cherrylee Samson, Co-founder & CMO Hibarri
Yudhvir Ranchod, CMO Peach Payments

16:00 Networking Break

17:00 Investment & VC Future

The future of commodities is being reshaped not just by extraction and trade, but by innovation – and that innovation needs capital. The Investment & VC Future Panel explores how investment thinking is evolving across public markets, private equity, and venture capital in response to the rising intersection of commodities, climate, infrastructure, and deep tech.

This is the session where asset allocators, visionary founders, and strategic LPs unpack the capital stack behind tomorrow's breakthroughs – from mineral traceability startups to hydrogen infrastructure, mining automation, energy storage, and green industrial manufacturing.

Janade Du Plessis, Managing Partner Africa Launch Ventures
Evgeny Filichkin, Founder & CEO Alphaberry Capital
Brice Beumo, CEO Beko Capital Advisory Group

18:00 Ministerial Discussion on National Commodity Economy

In this discussion, influential ministers from across the continent highlight the most vital key trade agreements, sanctions and global trade deals that affect the commodity supply chains globally, and to release disaster prevention strategies related to the anticipated effects of these policies on global trade.

These ministers release the key policymaking plans that will directly and indirectly affect commodity production, consumption, supply chains and global trade flows worldwide within the next 12 months.

Which critical metals and minerals will need additional investment and infrastructure development with the world's new transition?

How does monetary policy affect the metal trade, and what can we do better to incentivize mine development and agriculture? These questions aim to be answered by the Ministerial discussion.

19:00 Disruptive Tech, Robotics & AI

Disruption is no longer a buzzword – it's an operational reality in the commodity sector. The Disruptive Tech Panel unpacks the breakthroughs that are transforming how we explore, extract, process, trade, finance, and move commodities. This is a real-world look at what's already being implemented, what's failing, what's scaling, and what's next.

From geological modeling to predictive maintenance, AI is replacing intuition with precision. What tools are already delivering returns, and where are the gaps? How are companies integrating ML into legacy systems? Real-time mirroring of mines, plants, and pipelines is helping firms simulate stress, failure, and efficiency. How accurate are these models? What's the cost of implementation, and how scalable are they?

Jay Van Zyl, Founder Ecosystem.ai
Ryan Blumenow, Director Ai.tuning
Ami Herman, Founder Coffeesai
Pierre Van Helden, Founder FiveWest

Day 3 – 20 Nov 2025

09:00 Intergovernmental Discussion

The Intergovernmental discussion must urgently confront a perfect storm of global challenges. To navigate this treacherous terrain, the discussion must address sustainable mining needs to feed a rapidly growing demand for critical minerals while mitigating climate change risks, disclose a strategy to significantly reduce unemployment rates and alleviate the turmoil ridden labor markets, and aggressively target the geopolitical instability to publicize a strategy for the global financial architecture to alleviate debt burdens and prevent a global recession.

It must further address ineffective monetary policies that are crushing developing nations with crippling debt that threatens to derail commodity trade, and answer the question: is BRICS actually going to launch a new currency, or is it all talk?

Reserved
Reserved
Reserved
Reserved

10:00 Hydrogen Economy

Hydrogen is being billed as the missing link in the energy transition – but how close are we to scaling it into a true global economy?

This panel unpacks the opportunities and obstacles shaping hydrogen's future: from green hydrogen production and infrastructure build-out to storage, transport, and end-use in heavy industry, shipping, and power.

We'll examine whether hydrogen can deliver on its promise of decarbonization at scale, who is financing the rollout, and what it will take for hydrogen to move from pilot projects to a cornerstone of the global energy system.

11:00 Billionaire’s Row

Billionaires’ Row at the International Commodity Summit 2025 is a unique and exclusive gathering of the most influential figures in the global commodities industry. This elite forum serves as a think tank for billionaires who have built empires in oil, metals, agriculture, and energy markets.

Beyond wealth, these individuals hold unmatched influence over supply chains, pricing trends, and market stability. The discussions at Billionaires’ Row delve into strategies used to build empires, economies and strategic partnerships globally. It reveals principles for successful business development in the commodity sectors. Competition, monopolies, and oligopoly development in the commodity sectors are discussed. Future predictions and economic outlook into exploring new opportunities in emerging markets are mentioned.

The mystery billionaires may only be revealed on the day !

The Networking Continues!
