INTERNATIONAL COMMODITY SUMMIT

CTICC, Cape Town, South Africa

17-20 November 2025

2025 POST-EVENT REPORT

MESSAGE FROM THE ORGANIZERS

AND NATIONAL REBRANDING OF SOUTH AFRICA AS THE COUNTRY OF ORIGIN

As year 1 of the International Commodity Summit reached completion, we witnessed the beginning of the snowball effect of a boost in foreign direct investment, venture capital industry development, and national rebranding within the commodity sectors of South Africa.

The core contribution of the International Commodity Summit is not just to South Africa, but to the international commodity ecosystem as a whole. A development of infrastructure is anticipated in the logistics, agriculture, energy and mining sectors globally as the commodity sector emerges from the shadows and starts harnessing attention from the light.

We thank each and every person who contributed to the ICS2025 and recognize the power of quality over quantity as our numbers stand positioned to grow for 2026.

- Hibarri CEO, Anje Kruger

PUBLIC OPINION

After circulating the event feedback form and analyzing our attendee statistics, the following data was gathered:

87%

of attendees would like to return in 2026

#1

the top compliment was on "quality of attendees"

49%

of delegates flew from other cities

78%

of attendees stayed until the very last day (4 days)

37%

of delegates flew in from overseas

MISSION ACCOMPLISHED!

All of Africa's Commodities Under One Roof

We are proud to have attracted producers from the Agriculture, Chemical, Energy and Metals Sectors, both upstream and downstream.

KEY LESSONS FROM THE DISCUSSIONS ON STAGE

The energy sector is witnessing integration between upstream oil, coal, wind and solar, where the sector has realized that new developments like hydrogen and nuclear energy do not threaten established energy ecosystems, but in fact, complete the ecosystem as the grid is now under more pressure than ever amidst a worsening energy crisis of 600 million homes without power.

The mining sector stands positioned for expansion as the need for critical minerals is ever-evolving, and recognizes the need for major capital injection to meet the demands of the next century, energy sector and AI boom.

The agriculture sector has seen major reform and exciting new developments, technologies, and the question of world hunger and food security is improving for the better.

Investor capital has shifted to private alternative investments as geopolitical uncertainty rises.

FEATURED SPEAKERS

Sithembile Ntombela, GM Marketing, Brand South Africa

Toni Gumede, Office of the CEO, Stakeholder Relations, Brand South Africa

Zanele Sanni, Chief Director Of Export Promotion, DTIC

Jaye Connolly, Chairman & CEO, RippleNami
